

BROWSER COOKIES: THE ULTIMATE GUIDE

 KnowledgeWise.ca

What are cookies?

Cookies are files that get created when you visit a website. The website creates a cookie on your web browser so it can recognize you in the future.

What is inside a cookie?

It depends. It could include your name or address, what pages you browsed, the contents of your shopping cart or information about which pages on the site you visited.

How to block cookies?

Privacy Badger is a browser add-on to prevent companies from tracking your online activities.

- Download Privacy Badger for the web browser you use (Edge, Chrome, Firefox, etc.) and add the extension to your browser.
- The Privacy Badger icon will be added to the extension menu on your toolbar.
- Click on the Privacy Badger extension icon when required to manage cookies.

When you don't allow cookies, what will happen?

Most websites will still allow you in, although you may not have access to the entire site's functionality.

Do you have to accept cookies?

No, you do not have to accept cookies. Cyberattacks can hijack cookies & gain access to your browsing sessions.
