

PROTECTING SENIORS' INFORMATION

If your professional organization works with seniors, you are in a position of trust to protect the personal information and private health information of your clients. Our customized workshops and seminars provide hands-on training to ensure you know your legal obligations and demonstrate industry best-practices for information management.

Contact us to discuss customizing a workshop for your organization.
Discounted Rates for Non-Profit Organizations

SELECTED TOPICS MAY INCLUDE:

Privacy and Security

Learn the fundamentals of security and privacy including spotting phishing attempts, preventing client data loss and keeping client data secure.

Information Handling

Includes best practices for knowing when and how to securely share client information when necessary.

Policy Training

Policy training is fundamental to protecting client data. Learn what privacy laws are applicable to your organization and how to create and enforce privacy policies that protect your clients and staff.
