

AI-Generated Intimate Images

Info For Teens

What To Know

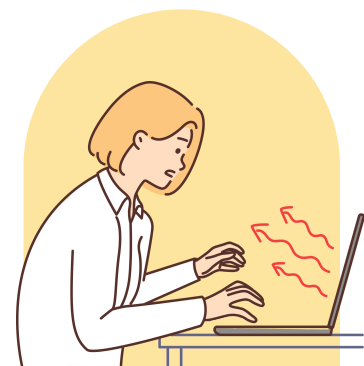

Creating and/or sharing AI-generated images as "DeepNudes" carries serious academic and legal risks. The Canadian Criminal Code defines sexual imagery to include not only actual images, but also any pseudo-images or digitally altered content that depicts minors, making such AI-generated content illegal. Creation of the images can lead to school suspension or expulsion and potentially criminal charges.

Being depicted in such an image can deeply harm the individual. The feelings of violation, embarrassment, and anxiety don't diminish just because the images are fabricated.

What To Do

If someone has created DeepNudes of you, you don't have to face this situation alone.

- **Get Support:** Check out the resources below to get assistance from professionals. Consider notifying a parent or trusted adult and direct them to our parent guide to better understand what you are going through.
- **Document** everything you can including dates, sender/poster information, screenshots, emails/texts, etc.
- Notify the **platform** if the images were shared on social media to have the images removed.
- Consider notifying **the school**
- Consider reporting to **local law enforcement**

Remember: you are not at fault and you are not alone!
