

# CATCH SCAMS

## TIPS ON HOW TO IDENTIFY SCAMS

Check the email address to see if it's familiar or even the same as a reliable or known email.

If the email, phone call or message mentions you doing something you never remember doing, you've likely never done it, hence a scam.

Don't ever fill in anything that asks for bank or personal information.

Secure websites usually have a lock at the top to the left of the url.

Be sure that the information that's been received is reliable and/or from a credible source.
